

# About

## Info Booklet

*Version:* 2.0.4  
*Web Address:* more.aboutf.com  
*This Document:* Aboutfrequency.pdf

### What We Do

**frequency is a computing development** small business. We are based in Sunnyvale in the heart of Silicon Valley. *frequency* develops cutting edge and classic computing for all computers and even for people without a computer.

*frequency* was established in 1996 and has four years of, and many, program releases. Our developers have been programming computers for four decades. We are freely advancing civilization and life itself, through hi-tech shareware and freeware.

We produce technologies for both markets; business and home. Our **Pro frequency** division products are designed for the business sector and our **Dream frequency** division products are designed for home users.

We produce computing technologies that work. *frequency* hi-tech, advanced computing technology works effectively, works efficiently, works everywhere. Our advanced design, optimized, cross-platform programs are written in Sun **Java** to work on all computers. *frequency* documentation, such as this document, is formatted in Adobe PDF to be readable on all computers.

All of our products come with a 30day free trial and also an additional 30day no questions refund period. We invoice monthly in arrears.

*frequency* computing saves a heap of time and money over doing things manually.

### Memberships, Accreditations and Affiliations

 Sun Associate Partner releasing Java Verified programs,

 certified, signed programs,  
authorized domain and certificate reseller,  
and distributed,

 Institute of Electrical and Electronics Engineers member,

 Search for Extra-Terrestrial Intelligence Institute member and contributor to BOINC SETI@Home since 1996,

Awarded five  **EDITOR'S REVIEW** s,

  distributed,  
 .com distributed,

 compatible and served,

 Publishing coverdisk distributed, France,

 magazine reviewed, Dubai, United Arab Emirates,

CPAN Comprehensive Perl Archive Network module archived,

 Drexel University (Penn.) Math Forum listed.

## Platforms Supported

*frequency* programs run on just about all computers. Our programs are written in  Sun Java (see [Java.com](http://Java.com)).

 Servers, desktops and laptops,  Cellphones, MIDs, netbooks and PDAs, and  web browsers.  
Including  Microsoft Windows,  Apple Macintosh,  SCO UNIX and  Linux, Sun  Solaris,  Palm,  
 SYMBIAN,  NOKIA,  Sony Ericsson,  Windows Mobile,  SAMSUNG,  Panasonic and more.

## Product Types

 General Programs,  
 Programs that require internet access,  
 Artificially intelligent programs & AI, virtual reality, cyberspacial environments,  
 Video & audio recognition and analysis,  
 Utilities for computing professionals; developers, web coders and sysops,  
 Robots; business and home use,  
 and Games.

## Name

**frequency**, the physical science measure of regularity; the naturally cyclic nature of life; *Life Cycles*. *frequency is Intelligence*. Once = an occurrence, twice = a repeat, thrice = intelligence. To create a repeating signal is a sign of intelligent life. Used as a base principle in the testing for (extra-terrestrial) intelligence by the SETI Institute and also by the University of California, Berkeley's BOINC SETI@Home grid computing project.

In life, in music, in experience: starts, ends, middle times. *frequency; Life Cycles*

## Philosophy

Our company is dedicated with unending **perseverance**. We create a bright, digital experience.

We are available. We strive to be ideal and just. Our programs are available now from our websites as **shareware**, freely ready to run with a single click, providing a month's worth of free usage. We have the technology to be able to do this. No tradition or dogma is unchallenged. *frequency* re-evaluates and improves where it sees possibility; GUIs redesigned, bio IO championed, boundaries broadened.

*frequency* freely gives its love to all its users. We believe in treating our users **right**, with integrity, respect and generosity. This includes providing a full and specialized service. Our service encompasses lifetime free support and lifetime free updates and upgrades. We allocate a social space on our websites for the user community to share ideas and experiences, tips and tricks, solutions and help, not forgetting jokes, recipes and chatting for the sake of society. We appreciate that our users are spiritual beings with wide ranging needs which we try our best to cater to. We produce computing for humans; modern Homo Sapiens. *frequency* is dedicated to the users being aware, intelligent, evolved and caring people, regardless of creed.

Our business has no allegiance, affiliation nor association with any religious, political or social body. We maintain a stance of **neutrality** within differing views.

*frequency* donates and has always donated a percentage of its revenue to **charity**. Charities supported include humanitarian charities, planetary charities and animal charities. Current benefiting charities may include UNICEF,  Amnesty International,  Doctors Without Borders (Medecins Sans Frontieres),  WWF, PETA and cancer research charities.

***frequency* is:**

- Ecologically & sociologically careful; full of care,
- Carbon neutral; we have no carbon footprint. All of our normal, carbon gas emissions are offset by us. The cost of this is fully uptaken internally and is not passed on to the users,
- Aiming for the smallest footprint possible; the least impact on our environment,
- Energy efficient, choosing renewable, green energy wherever available, for instance solar and wind power,
- Respectful of human choices and difference; we produce for omnivores and also for vegetarians (and for vegans),
- Non-xenophobic, non-racist, non-sexist, for ideal weight people, for overweight people, for underweight people and more; championing of humanity,
- Striving to be excellently just. We only bill if the product is used,
- Affording instant credit to our users, charging in arrears,
- Promoting lowering the financial barrier to computing power, by lowering the initial price of a program license,
- Freely advancing life itself, through hi-tech shareware and freeware.

***frequency* products are:**

- Made in the USA  • Made in California
- GM free
- Lead (Pb) free
- Made without harming animals
- Made without abusing people
- 100% natural
- 100% artificial
- ~100% logical
- Carbon neutral
- Organic
- Fair trade; All trades with peoples in lower income / developing global states are fair, as are trades with peoples in higher income / more developed states
- Built by humans for humans

**History**

*frequency*'s birth was in 1996. We firstly developed websites; user-friendly, hi-tech, multimedia rich. *frequency* metamorphosized into software application development in 2004. Our program releases started in 2005. *frequency* is currently incorporated as a private corporation in the State of California in the United States of America, with the number #C3007558. The business was in a focused research & development phase from late 2006 until early 2010. We have now a **stockpile** of developed software products ready to go onto the market. The *frequency* nouveau vague, new release wave, has started.

**Achievements**

- 2005 Program releases.  
First customer of our Dream *frequency* home computing products.  
CPAN accepted our basic module Net::ICQ::On into the Perl computing language library.  
Download.com Editor's Reviews.
- 2006 More program releases.  
More Download.com Editor's Reviews.  
Printed press articles written about *frequency* programs.  
*frequency* program distribution on magazine cover disks.  
Focused internal business development.
- 2007 Focused research and development.
- 2008 More program releases.  
Focused research and development.
- 2009 First customer of our Pro *frequency* business products.

- 2009 Start of *frequency* services including domain names and freemail.
- 2009 Start of web services, like Cher's Life pre-release.
- 2009 More Download.com Editor's Reviews.
- 2009 Focused research and development.
- 2009 Internal systems development.
- 2010 Internal systems development.

## Press

Our products have been received well by the press. Industry leader CBS C|Net Download.com has awarded five reviews to the *frequency* **catalog**, saying “we can easily suggest you give them a try” of the “solid” programs. Future Publishing has twice requested the products for its magazine coverdisks. ITP Windows Middle East has published a screenshot article, Drexel University (Penn.) Math Forum has recommended the math products for ages 6+.

## Users

User responses have included a “**hooray!**” from a joyous customer, “nifty,” an impressed customer and “clever method of handling the unlock code, just grab it from the copy buffer,” from a satisfied customer. User locations are worldwide ranging from *frequency*'s home State of California to Canada to Europe and around the planet.

## In-Depth Understanding

*frequency*'s developers are seasoned in computing, having used computers daily since the '80s'; for over a quarter of a century. This wide computing experience includes different CPU technologies and manufacturers, many 8b to 64b graphic and text operating systems, including Microsoft, Apple and UNIX systems for decades. This experience builds constantly, as the corporation uses novel and classic computing technologies for multiplicitous, frequent tasks. *frequency* has a great and in-depth understanding of the **workings** of computing. From the hardware with its firmware BIOS and memory cell bistable circuits, to the minute platters within a hard disc drive, to the monitor's light perceived as near-omni-colorful when it is solely a combination of the three primary colors originating from very small sources, to the static & toner system within a color, laser, network printer, to the theoretical computing systems using photonic quanta, to the current global standard encryption algorithm, to CPU mnemonics and op-codes, to everyday automation possibilities, to extremely secure client & server communication connections, to the vast internet communicating under precise protocols, to catching & handling errors within an multi-source modular OOP program, to efficient, multi-threaded, optimized program execution, to OSI layer technology interactions, to modern GUIs with large graphic, iconic menus, to multimedia interactive elements, with alpha layers allowing partially transparent graphics, to multi-channel hi-res audio, to advanced video compression codecs, to 4D vector modeled Immersive™ reactive environment data, to computerized sensing, recognition and reaction in real life environments to far more.

## Trend Setting

**Dream *frequency* IMDb Photos**, one week after the program being discussed on its message boards, Amazon IMDb added more use of photos to their internet database. *frequency* clearly **setting** the trend and showing the available market.

**Pro *frequency* Uptime Clock** was created to display a clock of a computer's uptime, before Microsoft added it to Windows with Vista. We noticed this possibility first in Miklos' AIDA32 the sysinfo utility. *frequency* here seeing a use for a technology and implementing a solution early.

## Hi-Tech

- *frequency* servers use Intel Xeon **64bit CPUs**,
- We use **RAID 1** data mirroring technology to ensure that no data is ever lost in a hard disc crash,
- All of our programs are **signed** using our Tucows certified 256bit AES SSL certificate verifying our name to show that no-one changed our program from the time of publication to the time it was downloaded onto the users' computer,
- **Secure communications** with the *frequency* servers using SSL AES 256bit,
- Private, **secure** user data storage,
- We use **pre-existing user data** (under license) to reduce unnecessary user data entry,
- We use **SATA2** storage for disc and file speed,
- We use **gigabit ethernet** for internet speed,
- We use **large cache CPUs**, with **high speed / frequency FSBs**, in conjunction with **multi-channel DDR2** memory for computing speed,
- *Note Bene*: These technologies are far from the days of the 8bit computers we used, with a few KB of memory, running at a few MHz yet still producing and running useable and fun software,
- **Bio IO**; biological access to the programs, to hear vocal responses and to control the programs simply by speaking to them,
- **Email IO**; email access to the programs, to send data and to get results back,
- **Telcoms IO**; fax and phone access to the programs, to receive results via fax and/or to hear vocal responses,
- **Webware**; web access to the programs, full control and results via any web browser, globally, the user doesn't even require their own computer.

## Features

- Runs on **all computers**,
- Runs even **without** a computer,
- **Computing You've Always Wanted™**,
- Saves time and **saves money**,
- All updates, upgrades and **lifetime support** are free with *frequency*,
- User **community** support is freely available at the websites,
- **Freeware**; free programs, whitepapers and over 20 free wallpapers,
- **User friendly**, multi-media interactive interfaces, including large graphics and many sounds,
- **Advanced** hi-tech: including artificial intelligence and alternate input & output (IO) methods like email IO and telcoms IO,
- Smilingly **presented**. Information and demonstration videos (and audio only option) are presented by charming presenters,
- **Cooler Than™** absolute zero.

## Current Releases

**Programs** *Runnable programs that do things on the user's computer.*

**New Program Releases & Re-Releases are Due in Early 2010.**

**Data** *Formatted data, available for multiple uses.*

**Pro frequency Data: Names List** Data. All US names. For example for developing a name spell checker.

**Services** *Formatted data, available for multiple uses.*

**Me EvokeMe.com** **Evoke Me**; Domain Names; *Be Evocative*. Low cost domain names. Free privacy, DNS, and domain and email forwarding.

**fCerts.com** **fCerts**; Website and Code Signing Certificates. Verisign, Thawte and GeoTrust from 75% of the list price.

**freqEmail.com** **freqEmail**; Freemail; *Absolutely Normal*. Free email includes free webmail and POP & SMTP email.

**ChersLife.com** **Cher's Life**; *True Life Stories*. True life video stories from real peoples mouths. Get paid to tell your stories. The more popular your story the more you get paid. *Pre-release stage*.

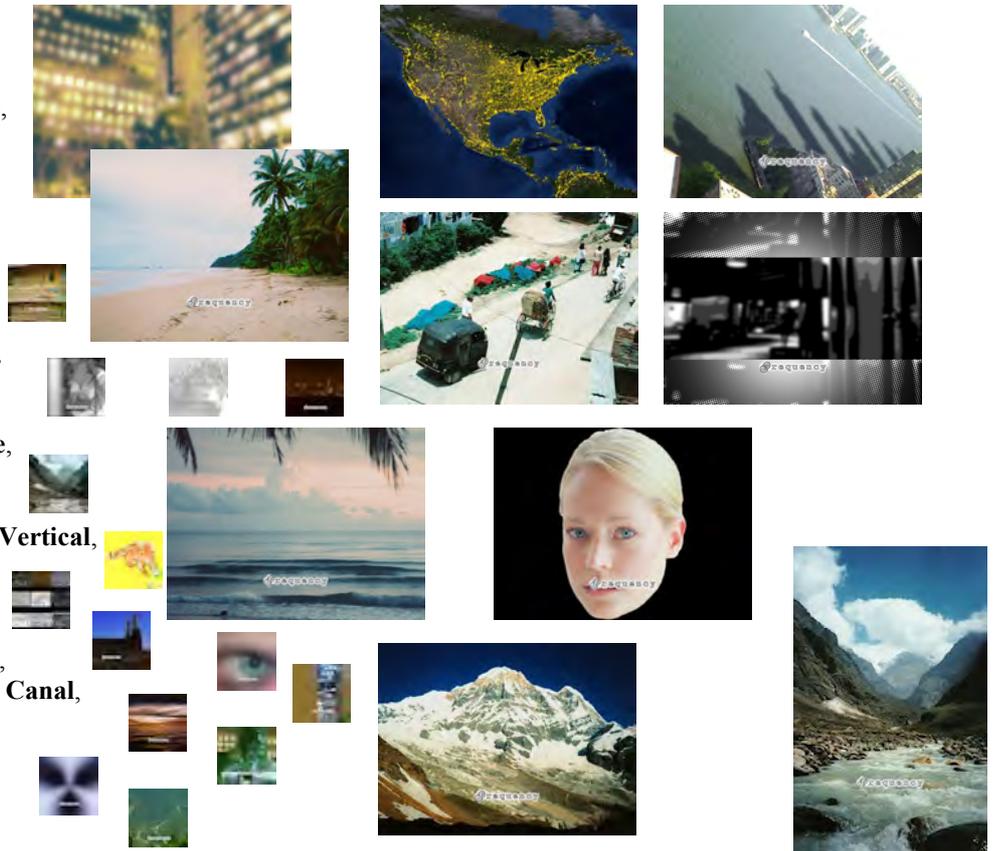

**SeekingIn.com** **Seeking In**; *Cyberspacial Socializing*. Chatting and also dating online. *Pre-release stage*.

**fSnapYou.com** **Snap You; Security Photos.** Protect yourself during everyday doorcalls, dates and more. *(coming soon)*

**Wallpaper** *Original artwork for displaying as your desktop background.*

*Note: These are available in standard and widescreen formats for horizontal and also for vertical screens. These works of art are also available as stylish mousepads, useful mugs, teeshirts, postcards and more at cost price.*

- Wallpaper: '50s' Intoxication,**
- Wallpaper: Beached,**
- Wallpaper: Bouquet,**
- Wallpaper: Civilization Lights,**
- Wallpaper: Cove Towers,**
- Wallpaper: Days,**
- Wallpaper: Environment,**
- Wallpaper: Evolution,**
- Wallpaper: Films,**
- Wallpaper: Government,**
- Wallpaper: Island,**
- Wallpaper: Looking at People,**
- Wallpaper: Leopard Person,**
- Wallpaper: Man Night,**
- Wallpaper: Model: Milky Face,**
- Wallpaper: Mountain,**
- Wallpaper: Mountain Stream,**
- Wallpaper: Mountain Stream Vertical,**
- Wallpaper: Pop Leopard,**
- Wallpaper: Pop Leopard B,**
- Wallpaper: Power Station,**
- Wallpaper: Recognition Video,**
- Wallpaper: Seven Areas and a Canal,**
- Wallpaper: Shark,**
- Wallpaper: Tree Lights,**
- Wallpaper: Tri Blue,**
- Wallpaper: Valley.**

**Whitepapers** *Technical documents freely published as public information sources.*

**Pro frequency Whitepaper: US-ASCII 7bit Code** This is the standard encoding format for all Western script text on computers.

**Upcoming Releases** *Products for imminent release.*

**Pro frequency Whitepaper: Encryption & Authentication** The basics of encryption + authentication, two important, everyday, slightly complex technological concepts,

**Pro frequency Whitepaper: Email** Explains the basics of the internet email system,

**Pro frequency Whitepaper: Leetspeak** Leetspeak explained,

**Pro frequency Whitepaper: Outsourcing** Outsourcing explained,

**Pro frequency Press Releaser** Get your press release; *On the Wire*,

**Pro + Dream frequency Wild Animals** Email utilities suite; *It's Your Inbox*,

**Pro + Dream frequency Email Watcher** Instant Email Alarm,

-  **Pro + Dream frequency Furry File Transferrer**      Transfer Simply,
-  **Pro + Dream frequency Epiphany Notes**      Yellow notes. Re-release,
-  **Pro + Dream frequency Mnem Gen**      Finds words in phone numbers, e.g. 1-800-ROBERTA. Re-release,
-  **Dream frequency Calculator: Interest**      Interest calculator for savings & investments + loans. Re-release,
-  **Dream frequency Calculator: Prime Numbers**      Calculate the prime numbers deterministically.  
Re-release,
-  **Dream frequency Calculator: Primality Tester**      Test any number for primality, deterministically.  
Re-release,
-  **Dream frequency Calculator: Factors**      Calculate the factors of any number with a single click. Re-release,
-  **Pro frequency ICQ Online Status Tester**      Detects ICQ online state. Re-release,
-  **Pro frequency Hex - ASCII**      Hexadecimal to and from ASCII instant converter.  
Re-release,
-  **Pro frequency Data: International Telecommunications Codes**      Data: Telcoms Codes. e.g.  
To reverse trace using caller ID,
-  **Pro frequency Data: Prime Numbers**      Data: Prime Numbers. Natural math beauty.  
Deterministically calculated. All the primes, under 50mill + stars.
-  **Pro frequency Website: People Who Purchased Also Purchased**      Website module: Links sales data of  
purchased items, just like amazon.com,
-  **Pro frequency Website: Bestsellers**      Website module: Bestsellers list from sales data,  
*and more...*

**Historic Program Archive** *Programs from 2005 – 2007 that are no longer distributed.*

*Includes:*

-  **Pro frequency Installer**      Securely installs and polices shareware programs,
-  **Pro frequency Website Content Management System**      Publishes a full, auto-updated website from  
PAD files,
-  **Pro frequency Google Submitter**      Automatically, (inc chrontask) freely submits websites to the  
Google search engine,
-  **Pro frequency Data: Permutations**      Data: Permutations 1 to 9. e.g. For maths or programming uses,
-  **Dream frequency IMDb Photos**      Download all the free photos of your favorite movie stars, direct  
from Amazon.com IMDb,

**In Development Programs**

Our current R&D includes the areas of:

**Recognition:** Both video and audio, inputting to computers from the real life environment around them,

**Environment modeling:** For both professional simulation and recreational game usage,

**Data Analysis:** Recognition from file meta & header data, and from file body data,

**Maps inc satellite:** Live, direct downloads from NASA, global elevation data, hi-res, true color, 0.3m image data,

**Video filters:** For still and for moving images, including advanced and multi-part histogram smoothing and editing,

**Games:** including real life sat map data, with artificially intelligent NPC opponents that play around the user's level.

## **More Information**

The **Information and News** section of our sites contains this information as well as the latest *frequency* news. This is available in classic text and also as audio and video presentations (*coming soon*).

## **Updated**

25 Apr 10;      Minor documentation and graphics update.

## **Legal**

Use of this or any *frequency* product is agreement to the *frequency* End User License Agreement. The latest version is available online at: [fLicense.com](http://fLicense.com)
