

# Importing / Exporting

---

CC File Hidden supports importing and exporting to your removable drives for any intent including Backing up files, and sharing files with your friends.

## Exporting

---

To import a file to CC File Hidden using a removable drive, first of all you need to export it to a secured Removable Drive. Exporting is the process of copying selected file(s) or all of the hidden files to an available removable drive as converted common files (including .docx, .pptx, and .ppsx) or .temp files that cannot be opened by normal programs. But there's a little bit of risk. After exporting there will also be a linking file inside your Removable Drive.

1. Select Export Files.
2. Plug your secure Removable Drive.
3. Select whether to export all of your files or to only export the selection and click 'Next'.
4. Select the Volume Label of the removable drive from the drop down list.
5. Specify the directory where you want to export the files inside the removable drive. (It will be created if doesn't exist).
6. Select the way of hiding in the unsecure disk space (removable space), whether 'As Common Files' or 'As .temp files'.
7. Click Start and wait for the process.

## Importing

---

Importing files from a Removable Drive is much easier than exporting to a removable drive. Pretend that you've brought a removable drive from your friend containing exported content from CC File Hidden, this is the way you can import those files into your CC File System.

1. Select Import in the Import / Export Selection dialog.
2. Plug in the Removable Drive into the computer.
3. Click Refresh, and find the Volume Label of the removable drive and select it from the drop down list in the top of the dialog.

*CC File Hidden will now check the Removable Drive and scan for the Linking files that is exported from your friend's computer. If it's found on the removable drive, a text saying 'Linking.nel is available' will turn blue. And available hidden files will start appearing in the list.*

4. Select the files that you want to import to your CC File System by checking each and every files.
5. Click 'Import' and wait for the process to complete.

NOTE: FILES IMPORTED TO CC FILE HIDDEN DOES NOT HAVE A LOCAL FILE NAME THEREFORE THEY WILL BE TRANSFERRED TO YOUR 'DOCUMENTS\CCFH\_IMPORT' FOLDER WHEN YOU UN-HIDE THOSE FROM CC FILE HIDDEN. CCFH\_IMPORT FOLDER WILL BE CREATED ONCE YOU IMPORT SOMETHING TO CC FILE HIDDEN.

WARNING: AFTER ALL FILES (ONLY EXPORTED FILES) INSIDE THE REMOVABLE DRIVE WILL BE DELETED INCLUDING THE LINKING.NEL FILE.

WARNING: AS MENTIONED BEFORE EXPORTING FILES AND SHARING YOUR REMOVABLE DRIVE WITH FRIENDS, CLIENTS OR ANYONE MAY CAUSE SOME SECURITY AND PRIVACY ISSUES AND NINPONIX® CORPORATION AND ITS REPRESENTATIVES DOES NOT GURANTEE THE SECURITY, BUT WE DO OUR BEST TO IMPROVE FASTER HIDING ALGORITHMS INSIDE PEN DRIVES / REMOVABLE DRIVES.

WARNING: .TEMP FILES AND COMMON FILES ARE UNACCESSIBLE ONLY IF THE USER IS OPENING THEM WITH THE DEFAULT PROGRAM CONFIGURATION IN HIS / HER COMPUTER. IF THE USER TRY TO RENAME THE FILES, TO THE PREVIOUS EXTENSIONS (IT IS VERY HARD TO DETERMINE THE CORRECT FILE EXTENSION WITHOUT KNOWING ANYTHING ABOUT THE FILES), THERE WILL BE A SECURITY ISSUE.
