Part 7: Research Assistants

Customize your toolbar (via right-click) and add a Sleuth button if you wish.

Sleuth

Choose Show Sleuth from the Window menu, or customize your toolbar to add the Sleuth toolbar button, to bring up our amazing Sleuth internet assistant.

Just type in a phrase and choose one of Sleuth pre-configured search choices including photo archives, font foundries, video and animation sites, reference sites, and translation services. Curio handles passing the appropriate form information to the site and instantly you see your results.

You can even customize Sleuth's available services with your own preferred sites.

Kid Safe Surfing
Curio also supports a method to automatically filter inappropriate content. See the *Curio User Manual* for details.
