Part 1: Introduction

Idea Space Templates

In addition to idea space styles, Curio includes several bundled idea space templates.

While you can apply a style to any existing idea space, you can only use a template when you are adding a new idea space to your project.

Creating Idea Space Styles
If you create an idea space style that you want to re-use simply right-click on the idea space in the Organizer and choose Save As Idea Space Style. Remember, the style only includes the background color, texture, and grid information.

Creating Idea Space Templates
If you create an idea space that you want to re-use as a template simply right-click on the idea space in the Organizer and choose Save As Idea Space Template. This template would include the style as well as any contained figures.
