Thank you for Activating ProTA 4!

If you are upgrading from ProTA 3, your older ProTA 3 files will need to be converted and imported into your new ProTA 4 data folder.

To upgrade and import your older ProTA 3 files, click Begin Upgrade then select your old version 3 ProTA data folder, which normally would have been located at ~/Library/Application Support.

Processing may take a few minutes and cannot be cancelled once started.

☐ Not now, but remind me again at next app startup.

No Thanks   Begin Upgrade
