1. Indemnity

MacHouse does not guarantee in any way that UConvert properly runs on any terminal that meets system requirements. MacHouse will not take responsibility for any damage that its software may cause. MacHouse does not guarantee that its software program produces correct numbers free of errors.

2. Distribution

MacHouse is the sole distributor of UConvert. No other party is allowed to distribute or redistribute this software program without written consent from the software company.

3. Installing UConvert

In order to use UConvert, it'll be better for you to create a folder with any name at first. Then put a copy of UConvert in it.

4. Uninstalling UConvert

When you launch UConvert, the application will create a folder named UConvert. For Mac OS, the path is Users/User/ Documents/ inside the volume of the operating system that is currently running. The easiest way of finding it is to open Preferences and switch to tabs to System files. Then click on Open. Go up by one level and delete UConvert as well as the application icon itself. For Windows OS, the path is C:\Documents and Settings\Administrator\My Documents\UConvert\. You can find the system folder by selecting Preferences under Help.

5. System requirements:

Mac OS X: 10.3, 10.4, 10.5 with PowerPC G5 or Intel Mac
Windows OX: Windows 2000, Windows XP, Windows Vista

For updates, user's guide (also select User's Guide under the Help menu) and more information on UConvert, go to http:// www.mhvt.net/quicktime/eng/uconvert/uconvert_tutorial.php

UConvert is a product of MacHouse.
